NOVELTIES

2021

elodie lime

Romantic season is here! Our new *elodie lime* enriches the medium-early variety *elodie* by a bright hue. Elodie blooms from the middle of January to the middle of February. Green-white flowers with ruffled edges, which appear to be double flowered, stand on firm stalks. Classic and modern at once – this novelty makes hearts beat faster!

- Large blooms with ruffled edges
- Flowering time from mid-January to mid-February

elunistar® white org eye improved

Large white flowers and a very uniform plant development: These are the significant attributes of *elunistar*® white org eye improved. What has already been a bright spot of white to our medium-early *elunistar*® series glows even more now. A real classic in the range of unistar gets an upgrade and fits perfectly to a series full of bright colours and large flowers.

- Uniform robust series
- Round plant habit
- Bright colours and large blooms
- Medium-early series
- Lots of special colours
- Flowering from the end of January

aurela appleblossom

The new *aurela appleblossom* fits perfectly into the middle-late series aurela, which is ready for sale from the end of February. Soft pink flowers are a balm for the soul. Just like all varieties of this series *aurela appleblossom* is a compact plant and needs no growth regulators. *Aurela appleblossom* completes the series' wellbalanced colour-palette perfectly and is right on trend.

- Wellbalanced colour palette
- No growth regulators necessary
- Middle-late series
- Ready for sale from the end of February

Victoriana mix

Nostalgic charm meets pure naturalness: *Victoriana* with its decorative flowers and long graceful stems is now available as an expressive mix, including the colours red, panda, moccha, lilac and yellow. The timeless glory of this hardy primrose is applicable for bowls, pots and flowerbeds as well, where this late-flowering series provides long-lasting blooms well into April.

- Polyanthus type with long stems
- Late series
- Long lasting blooms flowering well into April

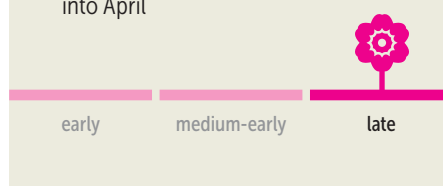

Victoriana mix

Victoriana yellow

Our new *Victoriana yellow* is an element of this mix. Its flowers shine in a bright happy yellow and rise over a natural looking sea of leaves. By a vigour, which fits in the series perfectly, *Victoriana yellow* nestles to the mix excellently and gives it a joyful spot of colour.

- Polyanthus type with long stems
- Late series
- Long lasting blooms flowering well into April

Victoriana yellow

All series in our product range consist exclusively of F1 hybrids
